Copernicus, a Polish-born, Italian-educated churchman, took a big step toward the scientific revolution in 1543 when he published his theories about how the Earth and planets move in relation to the Sun. Copernicus said that the Sun, not the Earth, was the centre around which the universe revolved. Copernicus delayed releasing his findings, but at the urging of supporters, he published his book *The Revolution of the Heavenly Spheres* around 1543, the year of his death. His Sun-centred universe, along with the notion that the Earth spins on its axis, upset some other astronomers and churchmen. To claim that God would place his creation on a spinning ball that revolved around another heavenly body struck many people as ridiculous, as it was against the teachings of the Catholic Church. The controversy only caught fire, however, after 110, when physicist and astronomer Galileo Galilei of Pisa published a book about his own astronomical observations, which supported those of Copernicus. The Catholic Church banned Copernicus' book, *The Revolution of the Heavenly Spheres*, in 1616 and did not lift the ban until 1835.

66. One can understand from the passage that Copernicus' book ----.

- A) was published following his death
- B) was published immediately after it was written
- C) reached a great number of readers
- D) upset astronomers in particular
- E) was a breakthrough in the world of science

67. Which of the following can be inferred from the passage?

- A) Copernicus wrote many books in his life time.
- B) Copernicus lived a long and healthy life.
- C) Galileo's findings were similar to Copernicus'.
- D) Galileo and Copernicus wrote a book together.
- E) Galileo also had trouble with the Catholic Church.

68. Which of the following is true about Copernicus according to the passage?

- A) Copernicus' book was rewritten by Galileo centuries later.
- B) Galileo worked hard to immediately lift the ban on Copernicus' book.
- C) It was forbidden to read Copernicus' book for a very long time.
- D) Copernicus thought neither the Earth nor the Sun was the centre of the universe.
- E) Galileo's research was the main reason for the ban on Copernicus' book.

Srirangam Island, at the confluence of the Kaveri and Kollidam Rivers in south-eastern India's state of Tamil, is home to a 2,000-year-old temple complex, major parts of which are still in use today. However, much of the complex is hidden or destroyed. Many older sections are buried under sediment as a result of centuries of flooding, and the complex was **ransacked** in the 14th century by general Ulugh Khan. Recent excavations at the site, guided by geologists with knowledge of flood sediment layers, have begun to reveal what was presumed to have been lost. Researchers including geologist Mu Ramkunar of Periyar University have uncovered parts of the temple destroyed by Ulugh Khan and unearthed artefacts such as pendant lamps and statues of the deity Gopalakrisnan with his consorts. Using geophysical surveying techniques, they have also identified what they believe to be the tomb of religious scholar and teacher Sri Manavala Mamunigal, who restored the temple complex in the 15th century. The tombs have been left unexcavated for religious reasons.

69. The temple on Srirangam Island mentioned in the passage ----.

- A) is still used today although most of its parts are buried or damaged
- B) was constructed in the 14th century by :Ulugh Khan after conquering the island
- C) has been revealed to contain 2,000-year-old artefacts belonging to Ulugh Khan
- D) has many older sections still in good condition despite centuries of flooding
- E) will not be reopened for religious reasons when its reconstruction is complete

70. The underlined word in the passage 'ransacked' is closest in meaning to ----.

- A) admired
- B) neglected
- C) utilised
- D) damaged
- E) altered

71. If can be inferred from the passage that ----.

- A) the geophysical surveying techniques used were not sophisticated enough to study the parts ruined by Ulugh Khan
- B) geologists specialising in sediment layers contributed a great deal to the rediscovery of the buried sections
- C) many artefacts unearthed from the tombs will never be seen by the public as this is not permitted for religious reasons
- D) Sri Manavala Mamunigal restored the temple primarily to make it his burial place
- E) The research from Periyar University are wrong about their assumptions that the temple complex might have been restored previously

Mary Tudor had never enjoyed good health, and it got worse rapidly after she became queen. Desperate to conceive an heir, she suffered the humiliation of two phantom pregnancies during which she displayed all the symptoms of an expectant mother although she was not pregnant in reality. But her swollen stomach may have been due to a cancerous tumour. Early in 1558, as Mary persisted in believing that she would soon be delivered of an heir, it was obvious to everyone else that she was dying. By 28 October, wracked, with pain, she finally acknowledged that there would be no 'fruit of her body,' and confirmed that the crown would pass to Elizabeth. She begged her half-sister to uphold the Roman Catholic faith, but the knowledge of how unlikely Elizabeth was to honour this request tormented Mary until her last breath. Upon hearing that Mary was dead and that Elizabeth was now queen, there was great rejoicing in London. All across the capital, church bells were rung and at night bonfires were lit, around which thousands of people gathered to make merry. The brief, brutal reign of Mary Tudor was over: now the nation's hopes rested upon her beautiful and charismatic successor.

72. It can be understood from the passage that Mary Tudor ----.

- A) was in good health before she became queen
- B) had two babies who both died soon after birth
- C) lied to her nation about her physical condition
- D) never believed she would have a legitimate heir
- E) died in pain possibly due to a cancerous tumour

73. According to the passage , when the reign of Mary Tudor ended, ----.

- A) the people of London were happy and hopeful
- B) her half-sister ruled the country unwillingly
- C) the Londoners understood that she actually had a miserable life
- D) Elizabeth ordered the churches to toll their bells
- E) Roman Catholicism was immediately abolished

74. What is the primary purpose of the author?

- A) To criticise Mary Tudor and her brutal reign over London
- B) To highlight the importance of being a charismatic leader
- C) To emphasise the need for quality medical care in medieval times
- D) To describe events leading up to Elizabeth's becoming queen
- E) To acknowledge the accomplishments of Elizabeth

Whenever photographer Gabriele Galimberti meets people on his travels, he asks the same question: "Can I see what's in your medicine cabinet?" Some are shy; others proud to do so. He asks this question to reveal who the people are. "The medicines they use tell us about their desires, their wants, their diseases. It's very intimate," says Galimberti. What can our medicines say about us? For one, how affluent we are. Cabinets in developed countries tend to overflow with pharmaceuticals. People in less developed countries collect medications more slowly. People take pills to be physically stronger and thus more **vigorous**, to sleep more (or sometimes less), to age more slowly, or for other reasons. View the different cabinets' contents, and cultures start to take shape. In Paris and New York, Galimberti saw large numbers of antidepressants and anti-anxiety pills. Indian people tended to choose medicines with Indian labels, independent of quality or potency. African cabinets had drugs from China, often unlabelled. Yet all the people photographed had something in common: None of them were sick.

75. Why does Galimberti ask people to show him their medicine cabinets?

- A) To examine diseases common across different nations
- B) To see whether people react positively or negatively to such questions
- C) To help them improve their economic conditions
- D) To collect detailed personal information from a wide range of nations
- E) To compare developed and less developed countries regarding quality of health care

76. The underlined word in the passage 'vigorous' is closest in meaning to ----.

- A) Skilful
- B) Memorable
- C) Energetic
- D) Flexible
- E) optimistic

77. According to the passage which of the following is true about how cultures use medicine

- A) Medicines are more frequently used to slow down aging in developed countries compared to less developed ones.
- B) Regardless of the nation they belong to, people tend to stockpile medicines even they do not really need them.
- C) In some countries, due to poor living standards, medicine cabinets do not show much about the culture.
- D) Indian people tend to choose antidepressants made in their own country although they are not very effective.
- E) African countries prefer medicines imported from China because they do not have labels.

A richly furnished grave excavated in 1878 near the Viking town of Birka in eastern Sweden had long been assumed to hold a powerful male warrior. The grave was equipped with a range of weapons, as well as a set of gaming pieces and a gaming board, which were seen as indications that the warrior in the grave was a military commander. A pair of horses was also found in the grave, one bridled as if prepared to ride off into battle once again in the afterlife. More than a century later, several researchers concluded – and genetic analysis confirmed – that this Viking warrior was actually female. When these results were reported in 2017, sceptics wondered whether there had been a testing mistake, or, perhaps, whether the person in the grave had been a warrior after all. A new review of the evidence led by Neil Price of Uppsala University concludes that the person in the grave was indeed biologically female, and that there is no reason to doubt that she was a warrior in a position of great authority. “Ever since its excavation, the burial has been interpreted as that of a high-status warrior,” says Price. “We think so, too, for exactly the same reasons as everyone else has always thought so, but in light of the new sex determination, she was a female high-status warrior.”

78. According to the passage the Viking grave found in Sweden did NOT include ----.

- A) a variety of weapons
- B) items indicating military rank
- C) life-size models of animals
- D) items used for entertainment
- E) horses prepared for battle

79. Sceptics of the results produced in 2017 ----.

- A) wanted further genetic testing to be conducted on the remains
- B) reviewed evidence again with staff from Uppsala University
- C) doubted the rank of the warrior in the grave, not the accuracy of the genetic analysis
- D) have been proven wrong by the new sex determination
- E) created controversy by publicly opposing the results

80. Which of the following conclusions can be reached based on the passage?

- A) Despite overwhelming evidence to the contrary, not all Viking warriors were female.
- B) Even if evidence is conclusive, some refuse to believe Viking women were able to hold high military positions.
- C) Testing mistakes occur frequently in archaeology, which means that all results should be questioned.
- D) Excavation of burial sites is a tricky process and requires several different types of testing.
- E) Researchers at Uppsala University are more open-minded than those at other Swedish higher education institutions.
